

**Integrated Top Access**  
Intuitive access to power and data

# Integrated Top Access

## Intuitive access to power and data

Today's habits of mobile working require **more and more laptops and cell phones**. Power and data access needs to be easy and intuitive. That's why Steelcase developed an **integrated solution**.

- It matches with the finish of the desktop to remain discreet.
- Its clever mechanism will surprise the user thanks to soft opening and closing.
- Integrated Top Access allows you to move your computer away easily with no obstacle in order to perform another task (flush and cables coming out of the back).
- Available as an option on most Steelcase desk ranges. Always to be specified with desk cable tray.

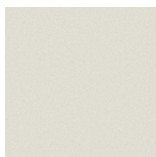

Closed: Maximise the use of the workspace

Open: Instant and smooth access to power and data
